Nursing & Allied Health

Subject Headings

and Cross References Used

in the

CUMULATIVE INDEX TO
NURSING & ALLIED HEALTH LITERATURE

1977

PREFACE

The first four editions of NURSING SUBJECT HEADINGS were published separately. This subject authority list has been included as part of the annual cumulation since 1971. It is a guide to the use of subject headings as used in the CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE. A listing of the new headings which have been introduced with this 1977 revision and the headings under which material on these subjects was formerly indexed is included.

This list follows the form adopted by the Library of Congress and uses the same symbols, e.g.,

- sa indicates a see also reference
- x indicates a refer from a see reference
- xx indicates a refer from a see also reference

See references (x) refer from terms not used to those used. These references appear in alphabetical order, but are in lower case, e.g.,

Adenoids See: TONSILS AND ADENOIDS

In other words, every heading in the list that is used or is a "good" term is in full capitals. Conversely, if a term is not in full capitals, then it is not a heading used for a subject entry.

See also references (sa) usually refer from a more general term to a more specific term, e.g.,

ANEURYSM
sa AORTIC ANEURYSM

A refer from see also reference (xx) indicates that a see also reference (sa) has been made from the more general to the more specific term, e.g.,

AORTIC ANEURYSM
xx ANEURYSM

Where terms are of more or less equal value both see also (sa) and refer from see also (xx) references may appear, e.g.,

ATTITUDE
sa BEHAVIOR
xx BEHAVIOR

BEHAVIOR
sa ATTITUDE
xx ATTITUDE

A cf reference precedes all other cross references and suggests the consideration of another term not closely related, e.g.,

GROUP WORK
cf TEAMWORK

Subdivisions of a subject are indented and preceded by a dash (--), e.g.,

NURSING EDUCATION
--ADMINISTRATION
--ASSOCIATE DEGREE PROGRAMS

Where pertinent certain subject headings are divided geographically, e.g.,

NATIONAL HEALTH PROGRAMS

--AUSTRALIA

--GREAT BRITAIN, etc.

The following subdivisions may be used.

ADVERSE EFFECTS
with any biological and physical agents, chemicals, drugs and manufactured products which result in a reaction not anticipated or desirable; also applicable to complications relating to certain procedures, e.g. anesthetics, diagnostic or surgical

ANALYSIS
with any substance or its constituents for identification or quantitative determination

ANATOMY
with any subject which is part of the body

BIBLIOGRAPHY
with any subject when pertinent

DIAGNOSIS
with any subject which is the name of a disease, condition or injury

DISEASES
with any subject when pertinent

DRUG THERAPY
with any subject which is the name of a disease, condition or injury for therapeutic action or prevention

EDUCATION
with any subject when pertinent

EDUCATION, CONTINUING
with any subject when pertinent

EVALUATION
with any subject when pertinent

HISTORY
with any subject when pertinent

IN INFANCY AND CHILDHOOD
with any subject when pertinent

INJURIES
with any subject which is a part of the body to identify traumatic wounds and injuries

NEOPLASMS
with any subject which is a part of the body

PHYSIOLOGY
with any subject which relates to a physiological condition as well as a part of the body

PHYSIOPATHOLOGY
with any part of the body or diseases resulting in abnormal functions in diseased conditions

PROCEDURES AND TECHNIQUES
with any specific clinical subject

STANDARDS
with any subject when pertinent

STATISTICS
with any subject when pertinent

SURGERY
with any subject when pertinent

Inverted headings are not indented but the inversion is indicated with a comma. Inverted headings file after the subdivisions, e.g.,

COLD--PHYSIOLOGICAL EFFECT
Cold, Common See: COMMON COLD

One class of Headings omitted from the List for which the Indexer supplies specific names as needed:

Names of National and International Organizations

Scope notes indicate the range of subject matter to which a heading is applied in CINAHL. For an example of this, see under the heading NURSING.

The editors gratefully acknowledge the assistance received from the use of other existing subject heading lists, namely:
